

### AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

#### Listing of Claims:

1. (Currently amended) A seat slide comprising:
  - a first guide;
  - a second guide configured to be guided by the first guide, ~~the second guide supporting~~  
to slide a seat;
  - a leading member configured to move the second guide relative to the first guide;
  - a cap mounted to the second guide,
  - the cap comprising:
    - a first support ~~for~~ inserted into the inside of the second guide and supporting the leading member; and
    - a second support extending from the first support toward the second guide for supporting the second guide, said second support having a distal end,  
wherein the distal end of the second support and the second guide are positioned in proximity to each other, thereby defining a gap between the distal end and the second guide.
2. (Original) The seat slide according to claim 1,  
wherein the cap covers an end of the second guide.
3. (Currently amended) The seat slide according to claim 1,  
wherein the second support includes a plurality of second supports extend extending  
symmetrically relative to the first support.

4. (Currently amended) The seat slide according to claim 1,  
wherein the cap comprises a first wall facing ~~the~~ an end of the second guide, the first wall being formed as a unit with one of the first and second supports.
5. (Original) The seat slide according to claim 4,  
wherein the second guide includes a first locking part, and  
the cap comprises a second wall extending from the first wall, the second wall including a second locking part locked with the first locking part.
6. (Currently amended) The seat slide according to claim 1,  
wherein the cap is integrally molded of a resin.
7. (New) The seat slide according to claim 1,  
wherein the second guide includes an upper rail having an upper wall and side walls extending from the upper wall,  
wherein the first support includes a bearing part having an outer circumferential face,  
wherein the second support includes ribs extending from the outer circumferential face toward the upper wall and the side walls,  
wherein distal ends of the ribs and the upper and side walls are positioned in proximity to each other, defining a gap between the distal ends and the upper and side walls.
8. (New) The seat slide according to claim 7,  
wherein the upper wall and the side walls include first locking parts, respectively, and  
wherein the cap includes second locking parts locked with the first locking parts, respectively.

9. (New) The seat slide according to claim 1,  
wherein the first support has an elongated hole for inserting the leading member into  
the elongated hole.
10. (New) The seat slide according to claim 5,  
wherein the first locking part has a hole, and  
wherein the second locking part includes a projection inserted in the hole.
